

Ayman Accolades

WACEM Leader Dr. Ayman El-Menyar presented the results of his landmark Study titled “Inflammatory Cytokines Response and Head Injury Biomarkers: Interim Analysis of a Prospective, Randomized Controlled Clinical Trial of Early Administration of Beta Blocker in Traumatic Brain Injury” at the 23rd European Congress of Trauma and Emergency Surgery (ECTES) in Lisbon, Portugal held from 28-30 April 2024.

The study is being conducted at the World Renowned Hamad Medical Corporation , Qatar and is led by Dr. El-Menyar and the Hamad trauma Center team.

The Study Investigates the impact of early beta-blockers (BB) administration on the adrenergic surge, inflammatory cytokines, and TBI biomarkers based on the HsTnT status in TBI patients with varying severities.

Dr. El-Menyar was awarded the best oral presentation for ECTS2024.

About Dr. Ayman El-Menyar

About HMC Qatar

“Hamad Medical Corporation (HMC) is Qatar’s main not-for-profit health care provider, and is based in Doha. It was established by Emiri Decree No. 35 in 1979. HMC manages several hospitals, as well as emergency, specialized, and ambulatory care centers, and operates both the national ambulance service and a home healthcare service.

HMC is the only healthcare organization outside the United States to receive simultaneous Joint Commission International (JCI) re-accreditation for all its hospitals, and in 2011 the ambulance service and home healthcare service also received JCI accreditation.” Per Wikipedia.
